Foreword

Road transport has a significant role in socio-economic integration and development of the country and is the dominant mode of transport in India both in terms of share in goods and passenger traffic and in terms of contribution to the national economy. Transportation by road has remained to be the preferred mode of transportation primarily because of easy accessibility, flexibility of operations and reliability.

Sustained economic development coupled with increasing road network and enhanced disposal income of households has fuelled the demand of motor vehicles in India. The total number of registered motor vehicles (transport and non-transport) increased to 326 million recording a CAGR of 9.83 percent during the last ten years (2010-2020).

The present issue of 'Road Transport Year Book 2019-20' collates data on registered motor vehicles furnished by the States and UTs during the year and over the years, across States/UTs and major cities. The publication presents comprehensive information in respect of production, sale, exports of motor vehicles, estimation of transportation of freight and passenger, motor vehicle taxation structure, details of licenses and revenue realized from road transport.

I hope the publication would be useful to administrators, policy makers and academicians especially for those interested in road transport sector. I gratefully acknowledge the cooperation extended by different agencies and motor vehicle and road transport regulation and administration. Contribution of the officers and staff of the Transport Research Wing involved in the work related to this publication is also recognised and deeply appreciated.

PREFACE

Road transport is the primary mode of transport which plays an important role in the movement of goods and passengers. This segment of transportation system is very significant for economic development and social integration of the country.

Road Transport Year Book is an annual publication of Transport Research Wing (TRW) of the Ministry of Road Transport & Highways which basically collates the data on registered motor vehicles furnished by the States and UTs. This issue, Road Transport Year Book, 2019-20 contains information for the year 2019-20 and 2020-21. Apart from registered motor vehicles, it touches issues relating to road transport such as road network, production, sale and exports of motor vehicles in the country, transportation of freight and passenger, motor vehicle taxation structure and revenue realized from road transport. Registered motor vehicles in million-plus cities of the country are also included in the report.

I am grateful to the concerned authorities of all States/UTs for furnishing the requisite data/information to TRW. I also congratulate officers and staff of the TRW for putting considerable efforts in bringing out this useful publication for the year 2019-20. I hope this document will be a good reference book for academicians, planners, automobile manufactures and other devout readers.

Constructive suggestions from the users of this publication are always welcome.

Road Transport Sector

1.1 Roads are a primary mode of transportation used daily all around the world to transport people and cargo. Road transport is one of the most cost effective and convenient modes of transportation in India both for freight and passengers as it has high penetration level with door-to-door delivery. Thus, it is vital for economic development and social integration of the country. India's transport sector is large and diverse; it caters to the

needs of 1.3 billion people. The road network of the Country consists of National Highways (NH), State-Highways (SH), District Roads, Rural Roads, Urban Roads and Project Roads of over 63.32 lakh km of roads as on 31 March 2019, which is the second-largest in the world, after the United States with 66.45 lakh km of roads. Category-wise details on road network in India is presented in the Table 1.1.

1.2 Transport sector in India comprises of various modes of transport such as roads, railways, airways, shipping, inland waterways and metro rail. Road transport, however remains the dominant mode both in terms of its contribution to Gross Value Added (GVA) and in terms of its share in passenger and freight transported. It is also a significant employer. Easy accessibility, flexibility of operations, door-to-door service and reliability have earned road transport a greater significance in both

passenger and freight traffic vis-à-vis other transport modes. It is also a key factor for promoting socio-economic development in terms of social, regional and national integration.

1.3 Sustained economic growth has brought about expansion of the transport sector. However, the percentage share of transport sector in Gross Domestic Product (GDP) of India has declined marginally from 4.99 percent in 2015-16 to 4.59 percent in 2019-20 (Table 1.2). Road transport alone

contributes 3.06 percent of GVA against the total transport sector contribution of 4.59 percent in the GVA at the national level in 2019-20, where the share of Railways was at 0.74 per cent, Air Transport at 0.12 per cent and Water Transport at 0.08 percent in 2019-20 (Table

1.2). The share of various sub-sectors of the transport sector in the GDP since 2015-16 at base year 2011-12 is given in Table 1.2. Road transport alone accounted for 66.7 per cent of GVA in total transport sector followed by Railways (16.1%) during the year 2019-20 (Chart 1.1).

Composition of Road Transport

- 1.4 Road transport comprises of two components i.e. manufacture of motor vehicles and road transport services. The share of road transport in the national accounts presented in Table 1.2 pertains only to the output or GVA in services component, which does not include the manufacture of Motor Vehicle components of road transport. Road Transport is also a significant employer.

Employment Generation–Service Component

- 1.5 The “services” component of Road transport sector provide direct employment in the form of drivers and conductors / cleaners and also generate other direct and indirect employments such as accounts and administrative staff, brokers, booking agents, loading and unloading operations, wayside facilities, dhaba & hotels, petrol pump etc.

During 2019-20, a total of 151.29 lakh non-professional and 13.05 lakh professional valid driver's licences were issued. State/UT wise details on valid driver's licenses issued are given in the Annexures 1.7 and 1.8. The percent share of professional and non-professional valid drivers licences issued are presented in the Chart 1.2. Non- professional category dominate the issue of driving licenses, i.e. more than 92 percent of valid Driver's licences issued during 2019-20 are under non-professional category. About 1986.00 lakh (84%) valid non-professional drivers' licenses were issued up to 31st March, 2020. During 2019-20, 1.27 lakh valid Conductor's licenses were issued (Annexure 1.9), whereas, a total of 37.29 lakh valid conductor licenses were issued as on 31.3.2020.

Employment Generation – Manufacture of Motor Vehicles

1.6 The manufacture of Motor vehicles, trailers and semi-trailers and other transport equipment generate employment in road transport sector. The details of employment provided through manufacture of Motor vehicles, trailers and semi-trailers and other transport equipment i.e. under National Industrial Classification Codes 29 and 30 during the period 2013-14 to 2018-19 is given in Table 1.4.

1.7 Employment generated in Motor Vehicles &

Other Transport Equipment sector has increased from 10.76 lakhs in 2013-14 to 14.66 lakhs in 2018-19 (Table 1.4), grown at a CAGR of 5.3 percent, which is more than the rate of growth of employment of 3.1 percent registered in all Industries. The transport sector shares about 9 percent of total industry employment during 2018-19, of which, 6.73 percent is contributed by manufacture of Motor vehicles, trailers and semi-trailers and the remaining 2.28 contributed by the other transport equipment sector (Table 1.4).

1.8 In total transport sector, 73.66 percent of employment has been generated through manufacture of Motor vehicles, trailers and semi-trailers in 2013-14 and marginally increased to 74.7 percent in 2018-19 (Chart 1.3). Despite some marginal fluctuations,

the percent share of employment generated by two subsectors of transport sector has registered marginal increase over the years. Transport sector's share in all industries employment has increased from 7.95 percent in 2013-14 to 9.0 percent in 2018-19.

PRODUCTION, SALE AND EXPORT OF MOTOR VEHICLES

1.9 The production, sale and export of motor vehicles during the period 2010-11 to 2019-20 has been analysed based on the data provided by Society of Indian Automobile Manufacturers (SIAM), New Delhi and presented in Annexures 1.2, 1.3 and 1.4, respectively.

PRODUCTION OF MOTOR VEHICLES

1.10 Production of motor vehicles consists of production of passenger vehicles, commercial vehicles, three wheelers and two wheelers. The total production has increased from 179.16 lakh units in 2010-11 to 226.48 lakh units in 2020-21 (Table 1.5 refer to). The

production of Motor Vehicles had been increasing till 2018-19, thereafter, showed a decline in 2019-20 and 2020-21 (Chart 1.4). The total production of two wheelers has decreased from 210.33 lakh in 2019-20 to 183.5 lakh in 2020-21, registered a decrease in growth of 12.76 percent corresponding to same period last year. Total production of passenger vehicles has decreased from 34.25 lakh in 2019-20 to 30.62 lakh in 2020-21, marked decline in the growth (10.6 percent) over same period last year. Production of three wheelers and commercial vehicles has remained stable over the years (Chart 1.5). The category-wise breakup is presented in **Annexure 1.2**.

Chart 1.5: The Category-wise Production of Motor Vehicles

Data source: SIAM

1.11 Amongst all motor vehicles, two wheelers has the highest share (81.02 %) in total production followed by passenger vehicles (13.52%) in 2020-21 (Table 1.5 and Chart

1.6). Despite some marginal fluctuations, the percent share of production of vehicles by various categories has remained largely stable over the years.

PRODUCTION OF PASSENGER VEHICLES

1.12 Passenger vehicles consist of Passenger cars, Utility vehicles and Vans. Amongst passenger vehicles, passenger cars accounted for 57.9 percent of total passenger vehicles produced in 2020-21 followed by Utility vehicles with 38.6 percent. However, the growth of production of Passenger cars has been on decline in some of the years 2010-11 to 2020-21. The total unit produced has decreased from

24.53 lakh in 2010-11 to 17.73 lakh in 2020-21, registered decline in the growth of 27.73 percent corresponding to same period in 2010-11. On the other hand, the production of utility vehicles has increased from 3.19 lakh in 2010-11 to 11.82 lakh in 2020-21, i.e. an increase of more than three times compared to 2010-11. Production of Vans had been declined over the period from 2010-11 to 2020-21 except some marginal increase registered in few years (Table 1.6).

PRODUCTION OF COMMERCIAL VEHICLES

1.13 Commercial vehicles shared 2.76 percent of total vehicles produced in the country in 2020-21 (Table 1.5). Total production has decreased from 7.57 lakh in 2019-20 to 6.25 lakh in 2020-21, registered a decrease of 18.5 percent corresponding to same period last

year. In commercial vehicles category, about 71 percent of vehicles produced are Light Commercial Vehicles (LCVs) in 2020-21, whereas Medium and Heavy Commercial Vehicles (M&HCVs) constitute remaining 29 percent. Total production of LCVs and M&HCVs has been on decline since 2018-19 (Chart 1.8).

SALE OF MOTOR VEHICLES

1.14 Despite some fluctuations, there has been an increasing trend in number of Motor vehicles sold during the period 2010-11 to 2020-21. The total number of vehicles sold has increased from 178.52 lakh in 2010-11 to 215.45 lakh in 2019-20 and then decreased to 186.16 lakh in 2020-21. Details are given in

Annexure 1.3. Two wheelers has the highest share in total number of vehicles sold i.e. 151.19 lakh (81.22%) followed by passenger vehicles, 27.11 lakh (14.57%) in 2020-21. Total number of two wheelers sold showed consistent increase from 133 lakh in 2010-11 to 211.8 lakh in 2018-19, and then decreased to 174.16 lakh and 151.19 lakh respectively

in 2019-20 and 2020-21 (Table 1.8). Total number of three wheelers and commercial vehicles sold showed downward trend during 2010-11 to 2020-21 (Table 1.8). Total number of motor vehicles sold has showed consistent decrease since 2018-19

(Chart 1.9). Category-wise break up given in Chart 1.10 reveals that Two wheelers has the highest share in total number of vehicles sold followed by passenger vehicles during 2010-11 to 2020-21.

1. 19 Roads are a primary mode of transportation used daily all around the world to transport people and cargo. Road transport is one of the most cost effective and convenient modes of transportation in India both for

freight and passengers as it has high penetration level with door-to-door delivery. Thus, it is vital for economic development and social integration of the country. India's transport sector is large and

diverse and catering needs of 1.3 billion people. The road network of the Country consists of National Highways (NH), State-Highways (SH), District Roads, Rural Roads, Urban Roads and Project Roads of over 63.32 lakh km of roads as on 31 March

2019, which is the second-largest in the world, after the United States with 66.45 lakh km of roads. Category-wise details on road network in India is presented in the Table 1.1.

PASSENGER AND FREIGHT TRAFFIC MOVEMENT BY ROADS

1.24 The availability of data on passenger traffic and freight traffic movement by roads poses a serious challenge as there is no availability of data for this segment unlike the Airways and Railways, which are better organized. However, TRW has endeavored to make

projections of passenger traffic and freight traffic figures based on the GDP growth rate and the elasticity of freight traffic of 1.4 and passenger elasticity of 1.9 as provided by the National Transport Development Committee in 2014 (Annexure 1.6). The estimated volumes of freight and passenger movement by road transport is furnished in **Annexure 1.6**.

Registered Motor Vehicles in India

2.1 There is consistent increase in the number of motor vehicles registered in India since 1951. The total number of registered motor vehicles increased from 0.3 million in March, 1951 to 326.3 million as on 31st March, 2020 (**Annexure 2.1**). The total registered vehicles in the country grew at a Compound Annual Growth Rate (CAGR) of 9.83 percent between 2010 and 2020 (**Annexure 2.1**).

2.2 Sustained economic growth and increased per capita income led to rapid growth of motorized vehicles in India. There were 326.3 million registered vehicles in India as on 31st March, 2020. The motor vehicle population has grown from 48.9 million in 2000 to over 326.3 million in 2020 (Chart 2.1), i.e. an increase of more than 6 times. Consequently, the number of registered vehicles per km. of road has also increased over the years.

Chart 2.1: Registered Vehicles in India

2.3 Category-wise growth of registered motor vehicles reveals, amongst all categories, two-wheelers accounted for the highest number, and registered 0.027 million two-wheelers in 1951 to 243.68 million in 2020 (74.68%) followed by Cars, Jeeps and Taxis

with 436.5 lakh (13.38%) (Table 2.1). Buses including omnibuses, which are the main mass transport vehicles on the roads, registered an increase of 7.2 percent in 2020 relative to the same period last year (**Annexure 2.1** and Chart 2.2).

LONG RUN TRENDS OF VEHICLES POPULATION

2.4 Long run trends of registration of vehicles reveals constant increase since 1951, i.e. an increase from 0.3 million in 1951 to 326.3 million in 2020. The composition of Registered Motor Vehicles shows that two wheelers have the largest share in total

vehicles i.e. 243.68 million in 2020 as compared to 0.027 million in 1951 (Table 2.1). Cars, Jeeps and Taxis hold second position in registration of vehicles showed remarkable increase over the years from 0.159 million in 1951 to 43.65 million in 2020 (Table 2.1).

2.5 Apart from the sheer dominance of the total vehicular population in India by two-wheelers, this category of vehicle has seen steady growth, whereas the share of buses has declined over the years (Table 2.2). This preference of road users for personalized means of transport over public transport

appears to have been dictated by reasons such as personal convenience, economic conditions and also by the inadequate service of public transportation system to keep up with the demand. Registration of vehicles has remained largely stable over the years for all categories of vehicles except for two wheelers.

2.6 The share of two wheelers in total registered motor vehicles in India stood at 74.7 percent in 2020 as compared to 8.8 percent in 1951 (Table 2.2). The combined share of cars, jeeps and taxis in the total number of registered vehicles was 13.4 percent in March, 2020, marking a steep decline from 52 percent in 1951. The share of buses in total registered vehicles has declined from 11.1 percent as on 31st March 1951, to 0.07 percent as on 31st March 2020.

Omni buses have also been included in the fleet of buses from 2001. The share of registered goods vehicles in the country accounted for 26.8 percent in 1951 declined to 4.4 percent in March 2020. The share of 'Other vehicles' include tractors, trailers, three wheelers (passenger)/Light Motor Vehicles (LMVs) and other miscellaneous vehicles increased from 1.3 percent in 1951 to 6.9 percent in 2020 (Table 2.2).

Composition of Vehicles Population in India

2.7 Registered vehicles consist of Transport and Non Transport vehicles. Detailed category-wise newly registered vehicles during 2019-20 and total registered vehicles as on 31st March, 2020 are given at **Annexure 2.2**. India has a total of 32,62,98,801 vehicles registered as on 31st March 2020, out of

which, 29,81,35,877 (91.4%) are non-transport vehicles and the rest 2,81,62,924 (8.6%) are transport vehicles (Table 2.3). Out of the total of 2,56,51,892 newly registered vehicles in 2019-20, 2,35,04,067 (91.6%) are in the non-transport category and the remaining 21,47,825 (8.4%) are in the transport category (Table 2.3).

2.8 The share of Non-Transport vehicles in total registered vehicles as on 31st March, 2020 was 91.4 percent while that of Transport vehicles was 8.6 percent. As far as the new registered vehicles are concerned, i.e. vehicles registered during 2019-20, the share

of Transport and Non-Transport vehicles was 8.4% and 91.6% respectively (Chart 2.4 and Table 2.3). It is observed that the predominant share of non-transport vehicles vis-a-vis transport vehicles prevails in both total registered and newly registered vehicles.

Chart 2.4: Percent share of newly registered Transport and Non-transport Vehicles during 2019-20

Transport Vehicles

2.9 Transport vehicles consist of Multiaxled/ Articulated vehicles, Trucks & Lorries, Light Motor Vehicles (Goods & Passenger), Buses, Taxis, Motor Cycles on hire etc. The number of registered “Transport” vehicles, both goods and passengers, as on 31st March 2020 were 28.2 million (**Annexure 2.2**), accounting for 8.63 percent of total registered vehicles in the country. In the Transport Vehicles category, Light Motor Vehicles (Passengers) accounted for about 36.1% (Table 2.4) and Trucks & Lorries accounted

for 17.2 percent during 2019-20. The truck industry remains in the hands of private operators and is highly fragmented and unorganized with majority being small operators, owning less than five trucks. Passenger transportation is in the hands of both private and public operators (State Road Transport Undertakings) with SRTUs accounting for only about 7.4 percent of registered buses in 2019-20 (**Annexure 1.5**). Private operators are thus the dominant player in terms of Transportation of passenger traffic.

Commercial Transport Vehicles In Use

2.13 Data on number of vehicles in use is crucial for understanding issues such as traffic congestion. This publication attempted to collect information pertaining to commercial transport vehicles in use as furnished by States/UTs based on valid primary permits issued by them (**Annexure 2.3**). Number of

commercial vehicles in use was 14.28 million as on 31st March, 2020 (**Annexure 2.3**). Goods Carriages have the highest share of 52.1 percent in total number of commercial vehicles in use in 2020 (Chart 2.8), followed by Contract Carriage with 42.7 percent.

2.15 The CAGR of total registered Motor vehicles grew at 9.83 percent during the period 2010 to 2020 (Table 2.6). Among the various categories of vehicles, the highest CAGR registered during the period 2010 to 2020 recorded by two-wheelers (10.28%), followed by cars, jeeps & taxis (9.81%), goods vehicles (8.31%), other vehicles (7.33%) and buses (3.7%).

2.16 The number of registered motor vehicles per 1000 persons has increased from 53 in 2001 to 246 in 2020, indicating an improvement in the accessibility of means of transportation for the public (**Annexure 1.1** and Chart 2.10).

2.17 There has been a staggering increase in the number of motorized vehicles, but the expansion in the road network has not been commensurate with this increase. While the motor vehicle population has grown from 55 million in 2001 to over 326.3 million in 2020, the road network has expanded from 3.3 million km in 2001 to over 6.3 million km in

2020. Consequently, the number of registered vehicles per km. of road has increased, adding to the road congestion. Data reveals that the number of registered motor vehicles per 100 Km of National Highways has increased from 95,244 in 2001 to 2,23,224 in 2019, increase of more than two times (**Annexure 1.1** and **Chart 2.11**).

Registered Motor Vehicle Population in India- State Wise Distribution

- 3.1 Total number of registered Motor vehicles has increased from 295.8 million in 2018- 19 to 326.3 million in 2019-20, registered growth of 9.35 percent corresponding to the same period last year (**Annexure 1.1**). The absolute number of vehicles registered across States and UTs varies widely and depend inter-alia on the size of the States/UTs in terms of population, road length, road transport, economic activity, etc.
- 3.2 Amongst the States, Maharashtra has the highest number of registered vehicles i.e. 37786 thousand (11.6%) followed by Uttar Pradesh with 34925 thousand (10.7%), Tamil Nadu with 32095 thousand (9.8%), Gujarat with 26837 thousand (8.2%) and Karnataka with 26118 thousand (8.0%) (Chart 3.1).

These top five States share 48.3 percent of total vehicles registered in the country as on 31st March, 2020. Small States/UTs like Goa, Puducherry, Chandigarh, Nagaland, Tripura, Meghalaya, Manipur, Arunachal Pradesh, Mizoram, A&N Islands, D&N Haveli, Sikkim, Lakshadweep, Daman & Diu together accounted for less than 1 percent. The UT of Lakshadweep with 23 thousand registered vehicles has the smallest share of less than 0.01% of total registered motor vehicles in the country. Among the States, Sikkim reported the lowest number of the total registered vehicles (54 thousand) with a share of 0.02% in the total registered motor vehicles in the country (**Annexure 3.1** and Chart 3.1).

3.3 Total Registered vehicles consist of Transport and Non Transport vehicles. The details of State-wise and category-wise number of registered vehicles during the year 2019-20 are displayed in **Annexure 3.3**, 3.3(a) and 3.3(b). The State/UT wise distribution of total registered transport vehicles (Chart 3.2) reveals that Maharashtra has the highest number of

registered transport vehicles, i.e., 3.381 million (12%) followed by Karnataka with 2.828 million (10.0%), Gujarat with 2.429 million (8.6%), Tamil Nadu with 2.244 million (8%) and Uttar Pradesh with 1.918 million (6.8%). These top five States together accounted for 45.4 percent of total registered transport vehicles in the country as on 31st March, 2020.

- 3.6 The State-wise and category-wise details of newly registered transport and non- transport vehicles during 2019-20 are given in **Annexure 3.3(a) & 3.3(b)**. State-wise and category-wise cumulative total number of vehicles (Transport and Non- transport) as on March, 2020 can be seen at **Annexure 3.3(c) and 3.3(d)**.
- 3.7 State-wise number of commercial vehicles in use as on 31 March 2020 is presented in **Annexure 3.5**. Maharashtra has the highest number of commercial vehicles in use i.e. 4.8 million (33.3%) followed by Kerala with 1.5 million (10.7%), Tamil Nadu with 1.3 million (9.1%), Andhra Pradesh with 0.9 million (6.2%) and Rajasthan with 0.7 million (5.2%). These top five States share about more than 64% of total commercial vehicles in use in the country as of 31st March, 2020. Details of State wise and category wise commercial vehicles in use in respect of reporting States are furnished in **Annexure 3.6**.

Registered Motor Vehicles in Million-Plus Cities

4.1 The Urban Centers are associated with high vehicular density and road traffic congestion. The number of registered vehicles (Transport and Non Transport) in 55 reporting Million-Plus Cities upto 31st March 2020 was 113.25 million which accounts for 34.7 percent of total registered vehicles in the country

(Annexure 4.1). There has been consistent increase in the number of vehicles registered in Million plus cities over the years. Total number of registered vehicles has increased from 35.61 million in 2010 to 113.25 million as on 31st March, 2020 (Annexure 4.2 and Chart 4.1).

Road Transport and Motor Vehicle Taxation in India

- 6.1 In the road transport sector, regulation and taxation of motor vehicles are treated as two distinct powers. The regulation of Motor vehicles falls within the Concurrent List (List III, Entry 35), which is jointly exercised by both the Central and State Governments with residuary powers with the Centre, whereas the taxation of motor vehicles essentially falls within the ambit of State List (List II, entry 56 & 57).
- 6.2 The Central Government thus regulates motor vehicles under the Indian Motor Vehicles Act, 1988, and Central Motor Vehicles Rules, 1989. The levies charged under the Act including fees for registering motor vehicles, obtaining driving licenses, transfer of ownership of motor vehicles, issue of permits and certificate of fitness of transport vehicles levied by State Transport Departments. Besides the levy of above-mentioned fees, States also levy taxes like the Motor Vehicle Tax (also referred to registration fees in some States), the passenger and goods tax, etc.
- 6.3 Under the pre-GST regime, the Union Government levied excise duty & import duties on Motor vehicles and Accessories, tyres and tubes, High Speed Diesel and Motor spirit and service tax on certain road transport services like rent a cab scheme, tour operator services etc. The Revenue realized from Road Transport by the Centre for the period 2009-10 to 2018-19 is presented in the Table 6.1.

6.4 Revenue realized from road transport by Centre has increased from Rs. 0.48 lakh crore in 2009-10 to Rs. 1.21 lakh crore in 2018-19. However, since 2016-17, there has been a decline in revenue i.e. from Rs 2.80 lakh crore

in 2016-17 to Rs.1.21 lakh crore in 2018-19. Year on year growth depicts a mixed trend, but declining since 2015-16 and registered a decline in growth of about 33.1 percent in 2018-19 over the previous period (Chart 6.1).

Chart 6.1: Revenue realized by Centre from Road Transport and YoY Growth (in percent)

6.5 The trend in growth of various sources of revenue (Chart 6.2) indicate that the revenue from High Speed Diesel Oil has the largest share of Rs 1.01 lakh crore followed by Motor Vehicles & Accessories with Rs 19211.1 crore and Tyres & Tubes with Rs 1090.6 crore. Motor Spirit had the largest share until 2011-12, however this has

declined to zero due to GST. In the post GST period, revenue from all source depicts a declining trend. Percent share of High Speed Diesel Oil in total revenue from road transport depicts that an increasing trend over the years from 2009-10 to 2018-19. For others, it is either more or less constant or declining (Chart 6.3).

- 6.6 Thus, it may be noted that High speed diesel oil is the single most important source of revenue for the Government with a share of 83.3% followed by Motor Vehicle & Accessories of 15.8% and tyres & tubes of 0.9% in 2018-19 (Chart 6.4).

6.7 Revenue collected by the State Government from various subsectors of road transport sector has increased from Rs 12901.7 crore in 2000-01 to Rs 63006.3 crore in 2020-21 R.E (Annexure 5.2), i.e. an increase of more than 5 times over the years. However, revenue from transport sectors has declined from

73879.9 crore in 2019-20 to 63006.3 crore in 2020-21 (R.E), registered a decline of 14.7 percent corresponding to the same period last year (Chart 6.5). Year on year growth presented in the Chart 6.6 reveals the mixed trend and took a downswing in 2020-21.

6.8 In respect of composition revenue from transport sector, revenue from tax on motor vehicles constitute about two-thirds of the combined revenue of States and UTs from road transport whereas taxes on passenger and goods constitute the remaining one-third (Chart 6.7). Motor Vehicles Tax and Fees has decreased from Rs 71499 crore in 2019-20 to

Rs 60681.5 crore in 2020-21 (R.E) declining the growth of 15.1 percent over previous period. The Tax on Passengers and Goods has decreased marginally from Rs 2380.9 crore in 2019-20 to Rs 2324.8 crore in 2020-21 (R.E). Details are furnished in **Annexure 5.2**. The YoY growth shows a mixed trend.

- 6.9 Different States use different basis for computation of registration fees, goods tax and passenger tax based on cost of vehicle, engine capacity, unladen weight, seating capacity etc. and use different rates, different periodicity rendering inter State comparisons of the above taxes in comparable. There is a complex matrix, which emerges once we try to put together the tax structure for different segments of Transport (Stage Carriage/ Contract carriage) and Non-transport Vehicles for different States together (**Annexure 5.4**).
- 6.10 It may be noted from **Annexure 5.4** that most of the States have switched over to one time tax regime/lifetime tax (LTT) in respect of the Motor Vehicle Tax for two-wheelers, cars and taxes belonging to the Non Transport category. In the case of Transport Vehicles for passengers, the passenger tax rates are differentiated based on whether the vehicle is for stage or contract carriage and with the seating capacity. Many States differentiate in taxes based on type of service (Ordinary/ Luxury/Express etc.) as also based on the area where the vehicle is plying in. In some States, routes are divided into different categories as Mofussil versus Town, City versus Rural areas etc. Goods vehicles are usually taxed on one time, quarterly and annual basis based on the registered laden weight (RLW) or Gross Vehicle Weight (GVW) or Unladen Weight (ULW).

Section - 7

Road Transport Sector Initiatives

Several initiatives have been taken by MoRTH in the Road Transport Segment. Some of the important Schemes/programmes being implemented by MoRTH in the above segment are given below:

1. Voluntary Vehicle-Fleet Modernization Program (Vehicle Scrapping Policy)

The Ministry of Road Transport and Highways has formulated the Vehicle Scrapping Policy that includes a system of incentives/dis-incentives for creation of ecosystem to phase out older, unfit polluting vehicles. In order to enforce provisions of the policy, rules have been issued/amended under the framework of the Motor Vehicles Act, 1988 and Central Motor Vehicle Rules, 1989.

The Ministry of Road Transport and Highways has issued a notification GSR 272(E) dated 5th April 2022 regarding mandatory fitness of motor vehicles only through an Automated Testing Station, registered in accordance with rule 175 of the Central Motor Vehicle Rules 1989, as under-

- (i) For Heavy Goods Vehicles/Heavy Passenger Motor Vehicles with effect from 1st April 2023 onwards, and
- (ii) For Medium Goods Vehicles/Medium Passenger Motor Vehicles and Light Motor Vehicles (Transport) with effect from 1st June 2024 onwards.

2 Progress on scheme for implementation of “State-wise vehicle tracking platform for Safety & Enforcement as per AIS 140 Specifications” in States/UTs under Nirbhaya Framework:

Govt. of India has approved a scheme, namely “Development, Customization, Deployment and Management of State-wise vehicle tracking platform for Safety & Enforcement as

per AIS 140 Specification”, in States/UTs under Nirbhaya Framework on 15th January 2020 with a total estimated cost of Rs. 463.90 Crore.

Under this scheme, Ministry of Road Transport and Highways decided to support the States/UTs to implement the project funds under the Nirbhaya Framework, and to take on board all the States/UTs to implement the setting up of Monitoring Centers at the earliest, in order to implement the vehicle tracking system and ensure safe commute to the women and children in public passenger transport vehicles.

3. Central Assistance for strengthening the Intelligent Transport System (ITS) in Public Transport System in the country

This Ministry is reviewing the existing scheme namely “Strengthening ITS in Public Transport System” to provide financial assistance to State Government for use of latest technologies such as GPS/GSM based vehicle tracking system, computerized reservation/ticketing system, inter-modal fare integration system etc. for services covering inter-city and mofussil areas and to provide financial assistance for preparation of total mobility plan for the entire State. The Ministry provides one-time financial assistance to the tune of 70% of the project cost to the States/UTs for IT related projects.

4. Training Programmes for Transport/Traffic Department Officials

For development of Human Resources in the Transport Sector, MoRTH has been sponsoring various training programs for Transport / Traffic Department Officials of States/UT Governments through leading institutions namely CIRT, Pune, ARAI, Pune, ESCI, Hyderabad, IRTE, Faridabad, IIT, Delhi, PCRA, Delhi and IIP, Dehradun.

5. Motor Vehicle Aggregator Guidelines-2020

In pursuance of the provision under Section 93 of Motor Vehicles Act, 1988, this Ministry has issued the Motor vehicle Aggregator Guidelines, 2020 on 27th November, 2020.

- i. These guidelines are intended to protect the interests of commuters mainly, by regulating the surcharges and by the procedures to be followed by the aggregators in customer interaction. Further, the guidelines also protect the interests of drivers engaged by the aggregators. Hence, the guidelines will in no way harm the customers or the independent cab drivers.
- ii. These guidelines will establish a regulatory framework for aggregators by State Governments to ensure that the aggregators are accountable and responsible for the operations executed by them. These will enable State Governments to implement a holistic framework for regulation of aggregators and their business model to provide ease of doing business, customer safety and driver welfare.
- iii These guidelines will also encourage technology-based solutions for the sharing of seats for trips on commercial vehicles as well as the private vehicle trips, amongst passengers travelling in the same direction, thus promoting better utilization of existing assets through appropriate regulatory measures.
- iv. These Guidelines include the regulation of fares both in the interest of the aggregator and the passenger.
- v. These Guidelines also define the eligibility of an Aggregator, conditions for grant of license for Aggregators and Application for grant or renewal of license, suspension of aggregator license.

- vi. To ensure timely and effective redressal of the Riders grievances on receipt of any complaint concerning the ride/ the Driver/ the condition of the vehicle, these Guidelines include complaints with regard to the Aggregator's App and Website.
- vii The Cab Aggregators shall ensure safety of all passengers and these guidelines broadly define all measures to be followed.
- viii To encourage shared mobility, State Governments may, by way of notification, relax the specifications in order to provide accessibility in urban agglomerations and areas beyond the limits of municipal corporations. This will enable the government to achieve its goal of ensuring maximization of using Public transport, reduced fuel consumption consequently reducing the import bill, reduced vehicular pollution thereby reduced harm to human health.

6. Targets under Accessible India Campaign for Public Transport:

Accessible India Campaign was launched by Hon'ble Prime Minister for creating universal accessibility for persons with Disabilities in Built Environment, Transport and Information & Communication Technology (ICT) ecosystem. The Campaign is based on the principles of the Social Model of Disability, which states that disability is caused by the way society is organized and not based on the person's limitations and impairments. Physical, social, structural and attitudinal barriers prevent people with Disabilities (Divyangjan) from participating equally in socio-cultural and economic activities.
