### Foreword

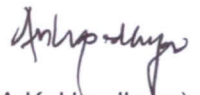

Over the years, road transport has become vital to the economic development and social integration of the country. Road transport has attained a dominant position within the transport sector and accounted for a share of 4.7 per cent in India's gross domestic product (GDP) in 2010-11. Easy accessibility, flexibility of operations, door-to-door service, reliability and the growing use of just in time strategies in manufacturing have contributed towards a steady increase in the modal share of road transport in the movement of both freight and passengers.

In a globalised world, an efficient road transportation system is vital for increasing productivity and enabling the country to compete effectively in the world market. A world class road transport system is essential for lending competitive edge to the economy.

Sustained economic growth, increasing disposable income, and rising urbanization has led to rising demand for road transport and personalized mode of transport (cars and two-wheelers), in particular. This is reflected in high annual compound growth in vehicle population of 10 per cent during 2001-2011, which entails doubling of the country's vehicle fleet every 6 to 7 years. However, the passenger car ownership level per 1,000 persons in India is still low at around 13 compared to 400 plus for most of the high income countries. This would suggest that, despite the rapid increase in growth of autos we are still at the low end in the vehicle ownership league with substantial scope of expansion over the coming years. The road transport sector in many ways exemplifies both the challenge and opportunity in infrastructure development.

The present issue of Road Transport Year Book: 2010-2011 provides a wide range of information, data and analysis pertaining to motor vehicles, motor vehicle taxation regimes, motor vehicle production and sales, permits and licenses, revenue realized from motor vehicle taxes across States/Union Territories and million-plus cities.

I hope that this document would be useful to administrators, policy makers and academia interested in the area of road transport. In particular, the cooperation extended by the source agencies spread across various States and Union Territories is gratefully acknowledged.

### PREFACE

The Transport Research Wing (TRW) of the Ministry of Road Transport & Highways collects, compiles, analyses, publishes and disseminates information on the road transport sector in India. The compilation of motor transport data is brought out in the Road Transport Year Book.

The last issue of this publication was brought out in 2011 and contained information upto 31<sup>st</sup> March 2009. The present issue of "Road Transport Year Book 2010-11" is the fifth issue in the series. It focuses on the registered motor vehicle population, motor vehicle taxation structure, licenses and permits and revenue realized from road transport in various States/UTs and in million-plus cities of the country upto 31<sup>st</sup> March, 2011.

Constructive suggestions from the users of the publication are welcome.

## 1. Overview of Road Transport Sector

1.1 Transport Sector in India is a very extensive system comprising different modes of transport like roads, railways, aviation, inland waterways and shipping, which facilitates easy and efficient conveyance of goods and people across the country. Road Transport is the primary mode of transport which plays an important role in conveyance of goods and passengers and linking the centres of production, consumption and distribution. It is also a key factor for promoting socio-economic development in terms of social, regional and national integration.

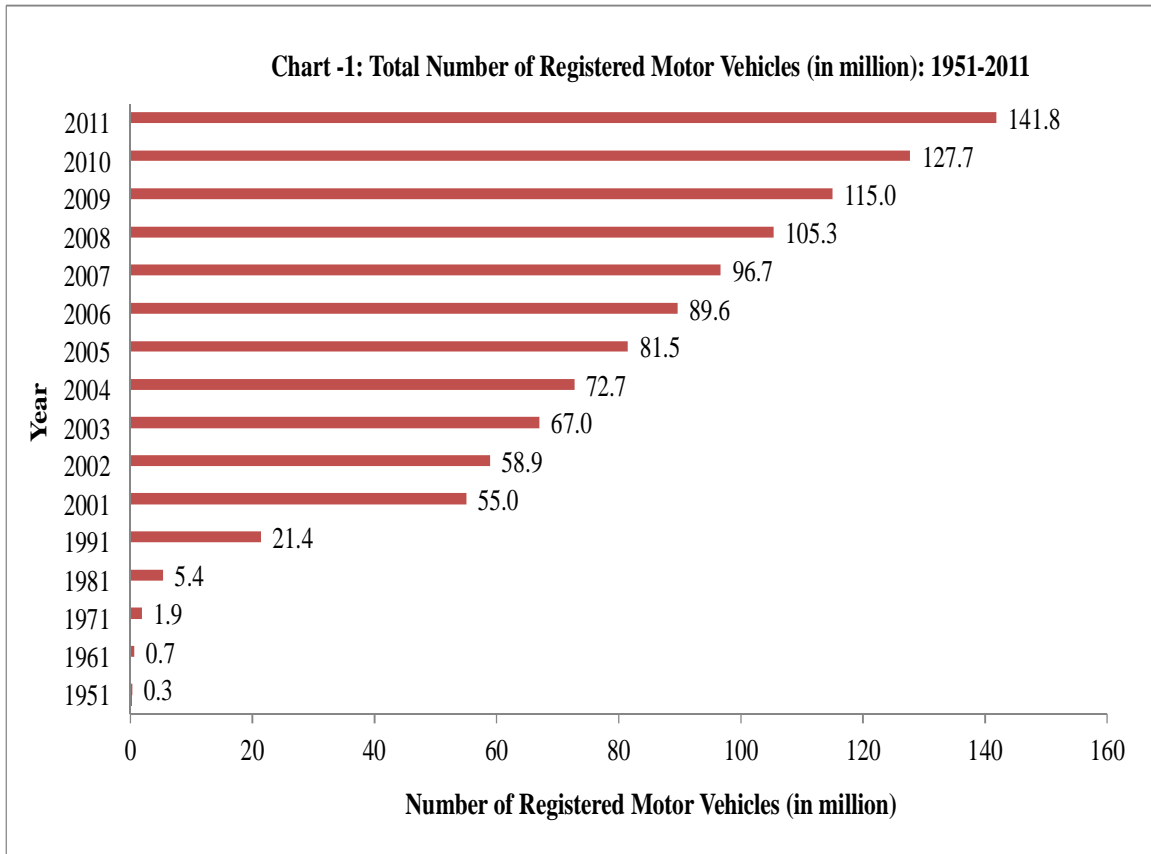

1.2 Sustained economic growth has brought about expansion of the transport sector. The share of transport sector in Gross Domestic Product (GDP) of India has increased from 6.0% in 2001-02 to 6.5% in 2010-11. In particular, the contribution of road transport sector in GDP has increased from 3.9% in 2001-02 to 4.7% in 2010-11. The share of various sub-sectors of the transport sector in the GDP since 2001-02 is given in Table 1.

## 2. Registered Motor Vehicles in India

2.1 India has experienced a tremendous increase in the total number of registered motor vehicles (Chart-1). The total number of registered motor vehicles increased from about 0.3 million as on 31<sup>st</sup> March, 1951 to about 142 million as on 31st March, 2011. The total

registered vehicles in the country grew at a Compound Annual Growth Rate (CAGR) of 9.9% between 2001 and 2011.

### 3. State -wise Distribution of Vehicle Population

3.1 With a registered motor vehicle population of 174 lakh, the State of Maharashtra accounted for the largest share (12.3%) of the total registered motor vehicles in the country (Chart-4). Tamil Nadu recorded the second highest share (11.0%) of registered motor vehicles, followed by Uttar Pradesh (9.4%), Gujarat (9.2%) and Andhra Pradesh (7.2%). These five States together accounted for about 49% of the total vehicles registered upto 31<sup>st</sup> March, 2011. The lowest number of motor vehicles (0.09 lakh) was registered in the UT of Lakshadweep (0.01%). Among the States, Sikkim reported the lowest number of the total registered vehicles of 0.39 lakh (0.03%).

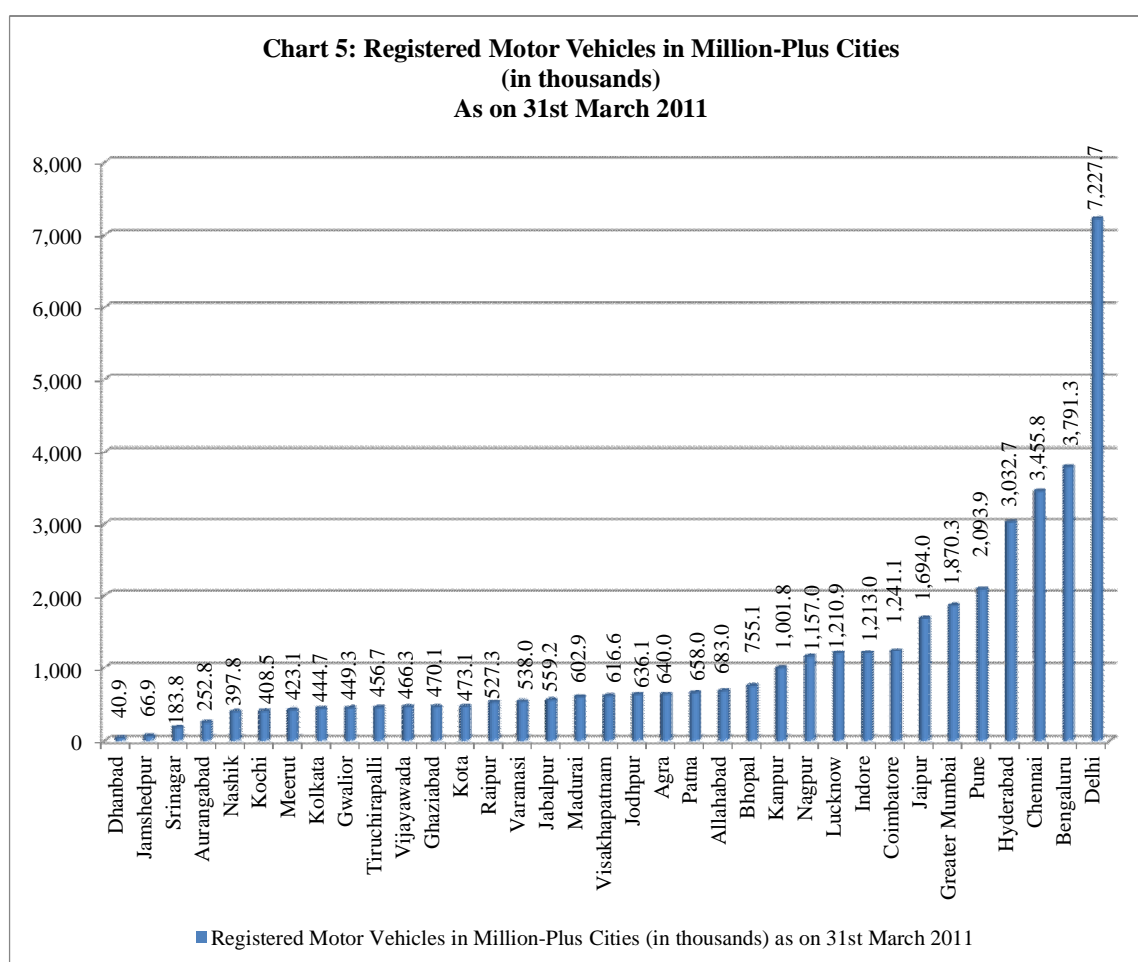

3.2 Growth in terms of CAGR of registered vehicles amongst the States/UTs show wide variations. While the highest CAGR for registered vehicles during 2001-2011 was recorded by Arunachal Pradesh (21.3%), followed by Dadra & Nagar Haveli (19.4%) and Tripura (14.1%), the lowest CAGRs were recorded by Nagaland (5.5%), Punjab (6.1%) and West Bengal (6.8%). As many as 26 States/UTs had CAGRs equal to or more than the all India growth rate of 9.9% during 2001-2011 (Table 4).

## 4. City- wise Distribution of Vehicle Population

4.1 Amongst the 35 million-plus cities for which information is available as on 31<sup>st</sup> March 2011, with a population of 72.3 lakh, Delhi had the largest number of registered motor vehicles, followed by Bengaluru (37.9 lakh), Chennai (34.6 lakh), Hyderabad (30.3 lakh) and Pune (20.9 lakh) (Chart 5). These five cities accounted for 49.3% of the total vehicles of the 35 Million Plus Cities. Delhi's registered motor vehicle population exceeded the combined vehicle population reported by Chennai, Kolkata, Lucknow and Mumbai. Dhanbad reported the lowest number of registered motor vehicles amongst reporting Million Plus Cities in India.

4.2 Amongst the top five cities in terms of the number of registered motor vehicles, the highest CAGR of 12.94% was recorded by Pune during 2001-2011. Hyderabad and Chennai, too recorded CAGRs of more than 10% (Table 5).

## 5. International Comparison on Vehicular Penetration

5.1 Table-6 indicates that the total motor vehicle penetration in India is low compared with developed countries. The car penetration in developed countries is much higher than in the developing countries. In contrast, the penetration of two wheelers in developing countries is higher than the developed countries. Developed countries like Germany and USA have car penetration rates (car/1000 persons) which are higher by factors of about 15 and 13 to that of China and by factors of 39 and 34 to that of India. In case of India and few other developing countries the penetration level of two wheelers (two wheelers / 1000 persons) is much higher compared to developed countries.
